

SKIN BEAUTIFUL DERMACEUTICALS™

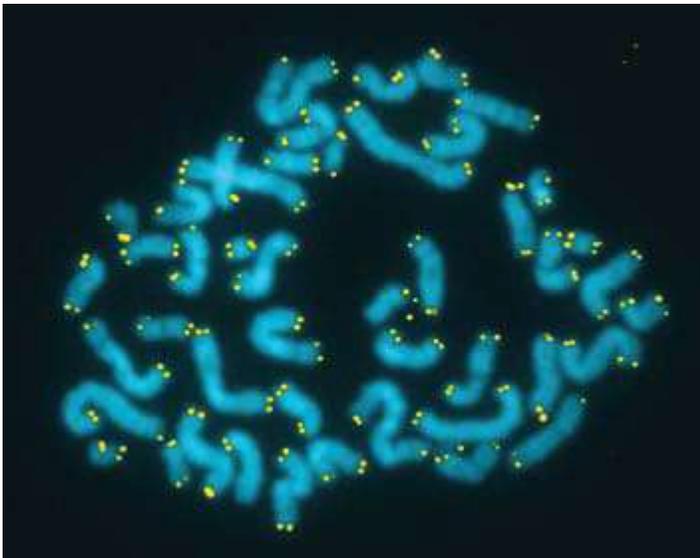

The Science Behind Renovage™ and Dermal Nutrition Antioxidant (DNA) Repair Cream

While many other anti-aging ingredients do a great job of treating the *symptoms* of aging skin, Renovage™ actually works at the cellular level to prevent the *causes* of aging skin. Renovage™ works directly within the skin's cells to improve their functional and structural recovery. It does so by repairing the cells' DNA so that when the cells replicate, they produce healthy, vibrant, more younger acting (and looking) copies of themselves. The ability of Renovage™ to repair the skin at the DNA level means that the results achieved are far more lasting than those of wrinkle creams which simply reduce the appearance of wrinkles without actually changing the structure of the skin itself.

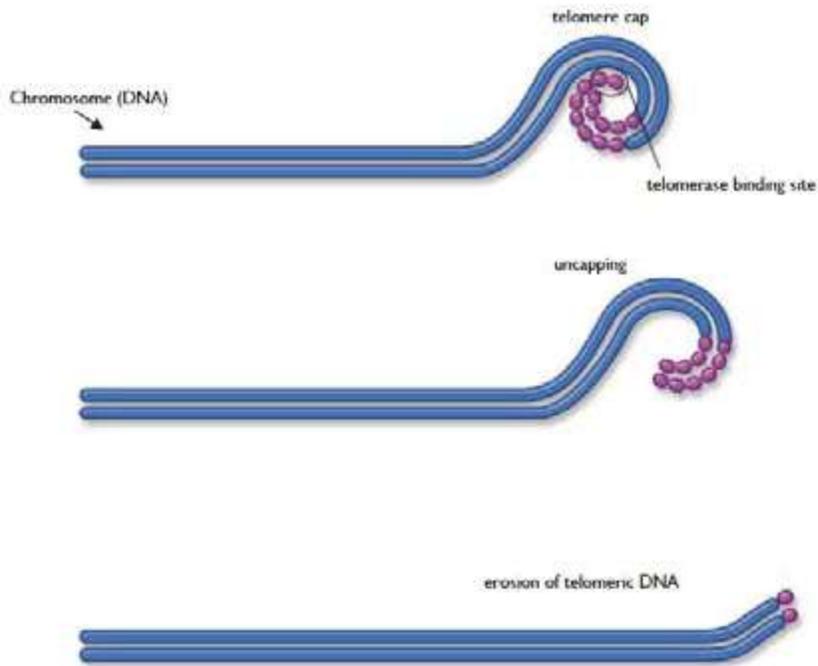

Clinical trials of Renovage™ resulted in the following findings:

- Sun spots and skin moisture improved in 100% of the panelists
- Redness and pore size reduced in over 90% of the panelists
- Skin roughness, fine lines and barrier function improved in at least 75% of the panelists
- Skin firmness, tone and elasticity increased in 75% of the panelists.

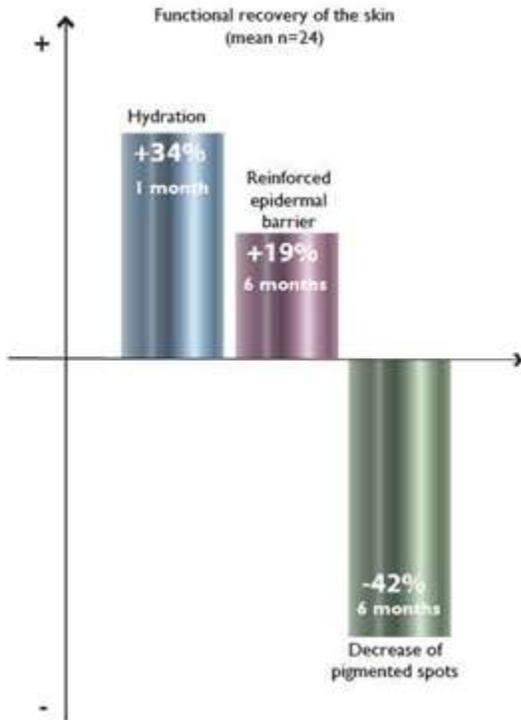

The following pictures and charts demonstrate the power of Renovage™ on aging skin cells:

Telomeres are biological clocks which regulate cell division

Progressive erosion of telomeric DNA with each replication

Results with regular application to skin

Before

After

Clinical testing also shows that Renovage™ can regenerate between 75% and 100% of your skin at its cellular level by removing the accumulated toxins which result in sunspots, redness, enlarged pores, and wrinkles. Renovage™ further promotes wound healing and scarring. (Wrinkles are actually very tiny wounds in the skin caused by the skin's lessening ability to perfectly replicate itself at the cellular level.)

SBD's **Dermal Nutrition Antioxidant (DNA) Repair Cream** combines the power of Renovage™ with high-tech, anti-aging peptides and superfruit antioxidants to enable your skin to keep on fighting the causes of aging. Using a base of gentle, natural moisturizers, **Dermal Nutrition Antioxidant (DNA) Repair Cream** slips effortlessly into your pores; tightening and lifting the surface, fading away blemishes and neutralizing discolorations. An easy twice daily application, once in the morning and again just before bed, allows the cream to go to work re-stitching your cells while you work, play or sleep. You'll awake to start every day with healthier, younger looking skin. Astound your friends and co-workers by taking years off your appearance with this safe and effective formula!
